POWERFUL PORTABLE AUDIO/VISUAL PRESENTATION TECHNOLOGIES

Use a single, simple-to-operate, audio/visual unit, designed and engineered with leading-edge presentation technologies. Combine this mobile set of compact components working together to show your presentations flawlessly every time. Imagine simply unplugging the unit and moving it from room to room.

Now, stop and focus on TVX from ExhibitOne®.

TVX is compact, flexible, and its high-end components make your communication crystal clear. But, its real beauty is you can just plug your laptop in, sit and give your masterful presentation *anytime, anywhere.*

BEAUTY OF A PORTABLE SOLUTION

TVX is a state-of-the-art, all-in-one system combining everything you need for effective presentations. The portable TVX is the perfect system when you don't have the budget or space to construct a dedicated multimedia presentation room. With ExhibitOne's experience in audio/visual engineering, we can incorporate TVX to enhance the technology in your existing presentation rooms. You also have the option to build a TVX system right into a customized ExhibitStation lectern, crafted to match the existing wood and stain finishes of your environments.

While the TVX system is transient, our support is rock solid. Every TVX system offers a 3-year warranty and is backed by the full services and support of your dedicated ExhibitOne team. This includes training; comprehensive customized documentation; and accessible, nationwide, local support both before and after you start using your TVX system.

ACCESSIBLE TECHNOLOGIES

With one-touch capabilities, TVX offers you affordable access to a complete A/V system of powerful, yet easy-to-use components. The interoperable, durable and upgradeable tools in the unit yield revolutionary efficiencies. And, they're all flexibly designed to work together seamlessly, no matter what laptop or computer you plug into the system.

To enhance your audience's experience, TVX delivers exceptional sound quality, plus it converts all signals into high-resolution so your images always look bright and sharp.

The core technologies of the TVX include:

- **Video display systems.** Your TVX system can display documents, pictures, 3-D objects, transparencies, x-rays, computer animations and computer-based presentations, video recordings, and DVD information. Plus, it's built around a touchscreen and annotation device, so you can easily direct your audience's attention to specific details.

- **Audio systems.** All TVX audio components are

designed to be flexible and comprehensive, and to enhance the quality of sound that reaches your audience. They also can interface with your existing sound system.

- **Videoconferencing.** Your system can incorporate videoconferencing to allow executives or trainers to connect from remote locations, bringing the value of timely, expert resources right to your audience.

POWERFUL TOOLS

To deliver the high-end capabilities you need for effective presentations, each TVX system is fitted with:

- A document camera
- A VHS VCR
- A 15" LCD touchscreen monitor
- A Pointmaker annotation system
- A scaler/switcher
- Laptop computer inputs (video and audio)
- Powered audio speakers
- Support for up to five additional display devices
- Anvil shipping cases for TVX and its document camera and touchscreen monitor

Optional features may include:

- A TVX custom, master control system
- An XGA LCD projector
- A portable, tensioned, 80" screen
- A plasma display
- A mobile stand for plasma display
- An anvil case for the projector and/or plasma display
- A DVD player
- An audio cassette player
- Custom wood enclosures
